GOBP enrichment_MOC
autophagy
regulation of gene expression
autophagosome assembly
microtubule cytoskeleton organization
actin cytoskeleton organization
endocytosis
actin filament organization
termination of G protein−coupled receptor signaling pathway
protein phosphorylation
positive regulation of developmental process
chromosome segregation
mitotic spindle organization
mRNA 3'−end processing
intracellular protein transport
phosphorylation
phospholipid biosynthetic process
intracellular signal transduction
negative regulation of transcription by RNA polymerase II
signal transduction
chromatin remodeling
regulation of DNA−templated transcription
